

# Descriptive Study: Quantitative Perspective

Misdi, S.Pd., M.Pd.

## What is it?

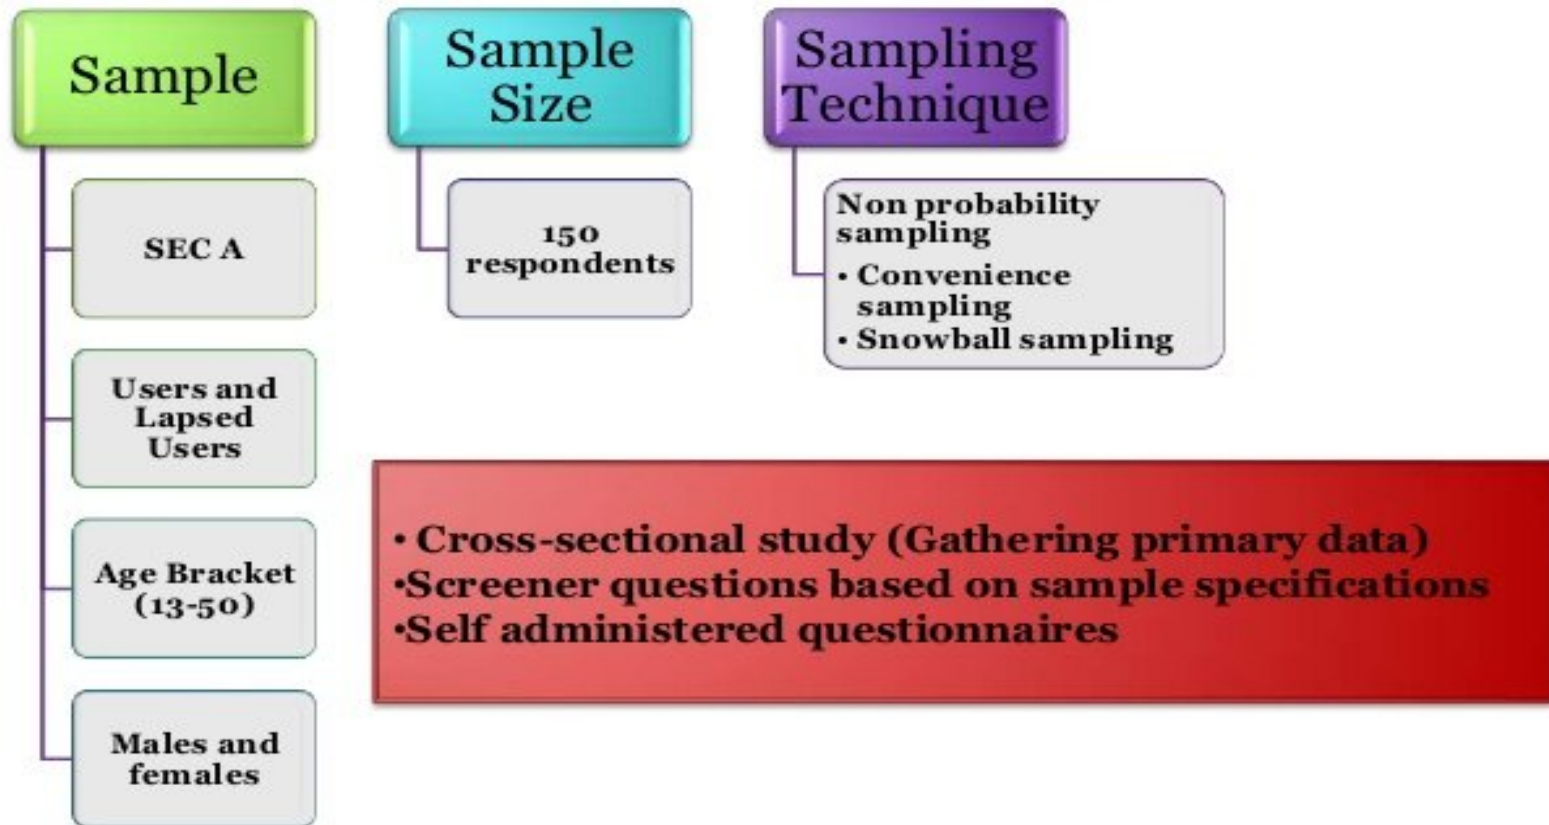

- To describe current states, e.g. numeral data using central tendency.
- Research ideas:
  - How is the Jakarta people's perception toward to best candidate of the 2017 governor?
  - How is students' perception toward English learning in madrasah, sufficient or insufficient?

# Descriptive Research Steps

- ❖ Statement of the problem.
- ❖ Identification of information.
- ❖ Selection or development of data gathering instruments.
- ❖ Identification of target population and sample.
- ❖ Design of information collection procedure.
- ❖ Collection of information.
- ❖ Analysis of information.
- ❖ Generalization and/or predictions.

# Sampling?

## Descriptive Research Design

- 
- It is nearly the same as other quantitative research, stop in central tendency and do analysis
